

Oh no! Christmas is in danger!

The cold Ice King has cast a spell on the Christmas chest with all the presents and locked it with two magical ice locks.

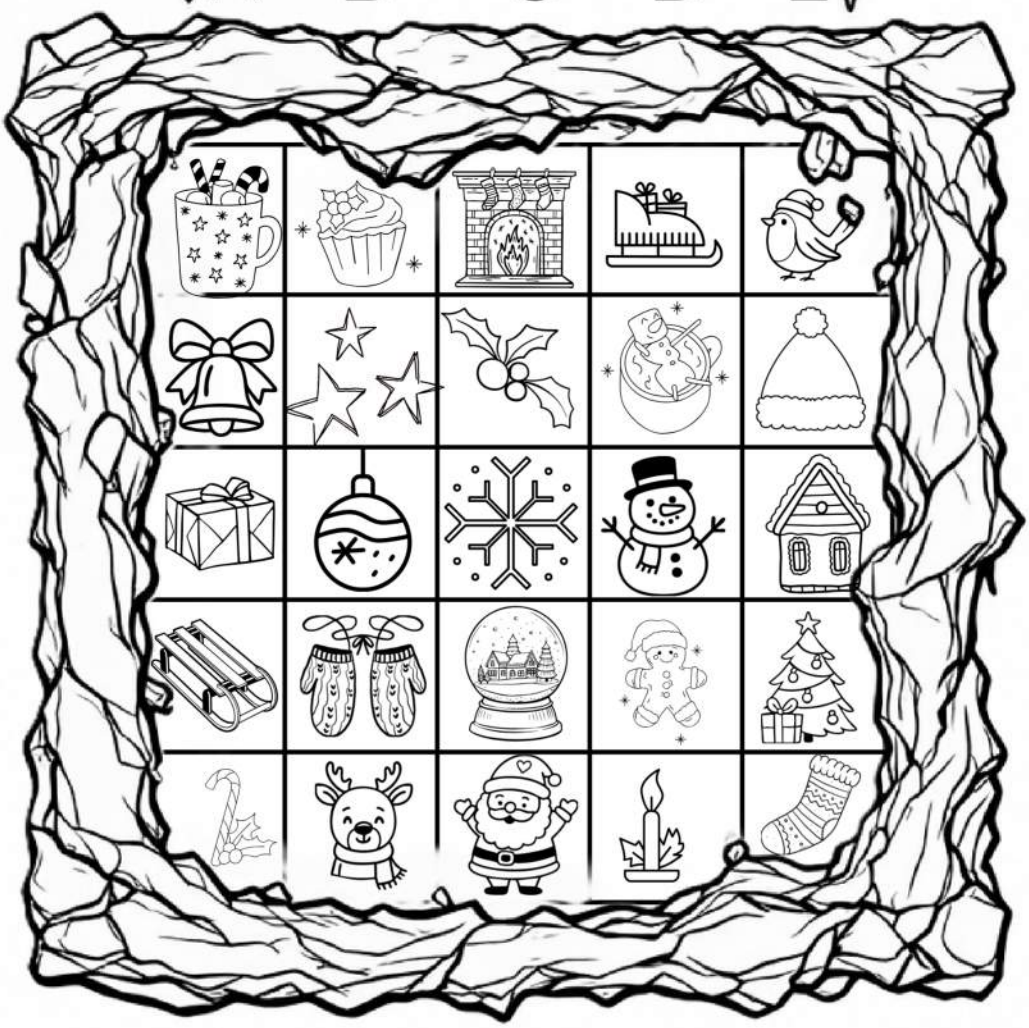

He wants it to stay winter forever and for no one to be able to celebrate Christmas!

To melt the ice and open the chest, you must find two codes of 3 digits.

You have 45 minutes to save the Christmas party.

Work well together!

papierpuzzels.nl

❄ Task 1: The Hidden Code

The cold Ice King has made the very first digit of the ice lock invisible! He has frozen the number deep into this ice grid. Only by finding the right squares and crossing them out will the ice melt and reveal the secret digit.

This is what you need to do:
Look closely at the letters at the top (A to E) and the numbers on the side (1 to 5). Find the 9 magical ice coordinates below on the map and put a big cross in each square with a pen!

B1, D1, C3, D5, D3, B2, B3, D2 and D4

Which digit do you see appearing in the crosses? Quickly write down this digit in the **first box** of your code page!

CODE 1: .....

papierpuzzels.nl

🌬️ Task 2: Help the Christmas Angel

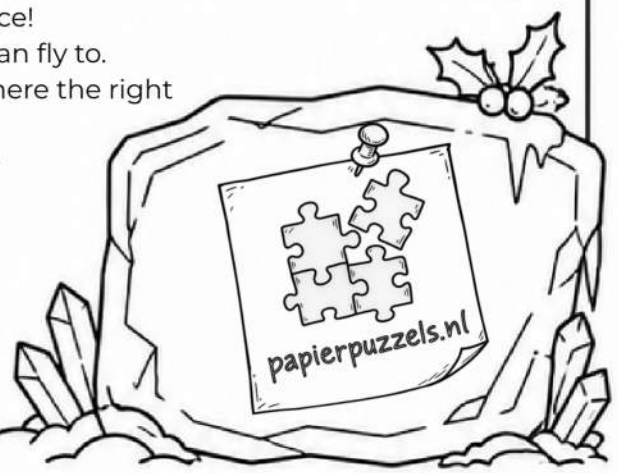

The poor Christmas angel is lost in an ice-cold snowstorm from the Ice King! She is trying to fly as fast as possible to a warm and cozy little house to warm up.

This is what you need to do:
Use the tip of a pen and find the right path for the little angel through the maze.

Pay attention:
Many paths end dead in the thick ice!
There are three houses the angel can fly to.
Which digit is next to the house where the right path leads?
Quickly write down this digit in the **second box** of your code page!

CODE 2: .....

Task 3: The Frozen Letter

The Ice King has chopped the letter with the last digit into pieces and thrown them around!

This is what you need to do:

1. Carefully cut out the **4 puzzle pieces** on this page along the dotted lines.
2. Put the pieces together in the correct way and stick them together with a piece of tape.
3. What a strange, icy curl is now on the letter... That is the secret writing of the Ice King!
4. Walk to the **magic mirror** in the room and hold the letter in front of it. Look closely in the mirror... which digit do you suddenly see very clearly?

Quickly write down this digit in the third box of your code page. Now your first code is complete!

CODE 3: .....

📜 Letter from the Ice King: Cold Sabotage!

Grrr... You cracked the first magical lock?!
How is that possible?!

Did you really think it would be that easy? I am the mighty Ice King and I hate Christmas cheer!

I want it to stay freezing cold forever.

Because you have solved my first three riddles, I have made the last three puzzles **much harder!**

You really have to think very carefully now, because I refuse to lose.

Don't think you can crack the code of my very last ice lock.

Good luck in the cold, little detectives...

Your time is ticking away!"

☃️ Task 4: The Enchanted Snowmen

The Ice King is furious that you cracked his first lock! To thwart you, he has cast a spell on two winter scenes. At first glance, they look exactly the same, but appearances can be deceiving...

This is what you need to do:
Look very closely and compare the two pictures with each other. The Ice King has secretly removed or added several things to the second picture.

Find all the differences and draw a circle around them. **How many differences can you find in total?**

This number is the fourth digit for the code page. Quickly fill it in the **first box** of the second ice lock!

CODE 4: .....

papierpuzzels.nl

⚖️ Task 5: The Magical Scale

The Ice King wants to throw everything off balance! To stop him and break his spell, two magical scales must hang in perfect balance. Look closely at the scales.

This is what you need to do:

- Scale 1 (above): You see 1 large gift perfectly balanced with 3 winter hats.
- Scale 2 (below): Now the Ice King has placed 1 large gift and 3 winter hats on the right side of the scale.

How many hats need to be placed on the left side (at the question mark) to make the scale balance again?
Calculate it quickly!

This number is the **fifth digit** for the code page. Fill it in at the star of **CODE 5!**

CODE 5: .....

papierpuzzels.nl

👣 Task 6: The Icy Word Search

The Ice King has hidden his magical secret chamber behind a secret code! The entrance is secured with a magical password. Only if you guess this word correctly, will the game master reveal the secret chamber to you!7nj3/z

F	R	O	Z	E	N
C	A	N	D	L	E
B	K	I	N	G	S
E	N	F	O	O	D
L	S	O	C	K	O
L	W	X	M	A	S

De woorden:

- BELL
- CANDLE
- FOOD
- FROZEN
- KING
- SOCK
- XMAS

This is what you need to do:

1. **Cross out the words:** Find the 7 words from the list in the word search below and cross them all out. The words can be found from left to right, from top to bottom, and diagonally!
2. Find the secret word: There are exactly **4 letters** left over that don't belong to any word. Read these letters from top to bottom and from left to right. What magical word do they form together?

[_] [_] [_] [_]

3. **Type this word into the app.** The app will reveal the secret chamber to you where the footsteps are hidden. There you will find the digit for **CODE 6.**

CODE 6: .....

papierpuzzels.nl

Cut these out and place them on the floor in a room somewhere (if needed, use tape to secure them).

Make sure the children find number 7 last.
